

R. GLEASON

FINISHING

Sarmax Apache 5

Fall Greetings!

The Fall season is upon us, with cooler nights and the changing color of the leaves. At R. Gleason, we are also experiencing seasonal changes that we are excited to share with you!

To start with, our company's reach continues to grow in markets both locally and out of state, with a strong lean into the luxury residential market. We are thrilled with the projects coming through our doors this season and enjoying working with many new contractor partners.

To match the demand, we have invested in 2 new pieces of equipment that will increase our efficiencies and add immensely to our capabilities and continue to upgrade and streamline the rest of the R. Gleason shop.

The Sarmax Apache 5 Italian-made coating machine. The beauty is that it sprays both sides simultaneously, as well as brushes in the finish. It will allow for spraying back brushing of impregnating stains, fungal/termite treatments, fireproofing and other low viscosity coatings, with a maximum output of 80 lineal feet per minute. However, you would need a catcher's mitt to handle that speed!

Felder Contuoura 6.0

The Felder Contuoura 6.0 wire brushing machine, with a gantry head that allows 4' wide stock

to be sanded. The Felder also has Tynex brushes to soften the different wood species to create a gentle, contoured look and feel.

In addition to our newly installed IR curing system, we are installing air blades in our enclosed booth (automotive) to expedite the drying process.

You must come by and not only see the upgraded shop in action, but also to view our new signage on the exterior of our building. We take pride in how we represent ourselves and our products and want to share it with you and your colleagues!

Wishing you a wonderful Fall season!

The R. Gleason Team
